Modern Management of RVOT – Freeway to the Lung

13th DHZB Lange Symposium
September 16/17, 2017, Berlin

dbb forum berlin
Friedrichstraße 169–170 • 10117 Berlin

Dear colleagues,

For 2017 we would again like to invite you to our symposium in Berlin.

The **13th DHZB Lange Symposium for Congenital Heart Disease** will take place on September 16 and 17, 2017 at the dbb forum berlin, Friedrichstr. 169/170, 10117 Berlin.

This year the DHZB Lange Symposium will again be held at the venue dbb Forum in the heart of Berlin. In 2017 the Symposium will look at the complex field of the management of the Right Ventricular Outflow Tract with all its facets and difficulties. These lie not only in the great variability in forms of disease but also in the procedural and technical innovations for individual therapy strategies. At this year's Symposium we would like to provide an overview of the current standards and discuss possible future developments – both surgical and interventional.

The two-day Symposium will again bring together clinical and research experts from Germany, Europe, and North America to present an exciting and innovative program. Their contributions will lead us into the fascinating and highly complex world of RVOT management and reflect

comprehensive standardized and innovative treatment strategies. We are already looking forward to stimulating lectures and interactive discussions. Discussion will again have a special place, to encourage interaction between the participants and the speakers and chairpersons.

The main topics will be:

- **Peter E. Lange Lecture | Historical evolution of patho-anatomical knowledge about the RVOT**
- **Modern Platform for Decision Making and Planning**
- **Transcatheter Valve Replacement (TPVR) – Past and Present**
- **Surgery - Paving the Way**
- **Complications / Limitations**
- **The Sunday Morning Highlight Lecture | Simulation of Physiology for Virtual Valve Replacement**
- **Nutrition / Pharmacology / Physiology**
- **Valve Replacement – Innovations**

To complement the scientific program there will be a Get Together at the venue on the evening of 16 September 2017 to allow further contact and continued discussion.

We are looking forward to a very interesting symposium and hope that we will be able to welcome you in large numbers in September 2017.

A handwritten signature in black ink, appearing to read 'F. Berger', written in a cursive style.

Prof. Dr. med. F. Berger
Director, Dept. of Congenital
Heart Defects/Pediatric Cardiology

Keynote

Professor **Philipp Bonhoeffer** trained in medicine in Italy. After years as Director of the catheterisation laboratory at the Necker Hospital in Paris he became Head of Cardiology at the Great Ormond Street Hospital for Children in London and Professor of Cardiology at the Institute of Child Health at University College of London.

He has strong interest in designing strategies to deliver cardiac care in developing countries focusing on sustainability and independence of programmes. He developed the technique of Mitral Dilatation with the Multi-Track system which was introduced in more than 25 countries.

He began a research program with the aim of replacing the pulmonary valve without open heart surgery and performed the world's first human trans-catheter heart valve implantation in France in 2000 and the 'first in man' procedure of a device, developed in association with Medtronic, in UK in 2009 (PPVI).

Philipp Bonhoeffer is an active musician and violinmaker.

Maximilian Emmert is a cardiac surgeon and translational scientist with extensive clinical and academic experience. He has more than 10 years of research experience in the fields of regenerative medicine, stem cell therapies and tissue engineering.

Since 2008, Maximilian Emmert is working in the Clinic for Cardiovascular Surgery at the University Hospital Zurich and in the Regenerative Medicine Program (REMEDI) at the University of Zurich.

In the year 2012 he obtained his habilitation in minimally-invasive, transcatheter tissue engineered heart valve therapies from the University of Zurich; and received his Ph.D. in Biomedical Engineering focusing on „Translational therapies to repair the heart“ from the Eindhoven University of Technology a year later.

Professor **Siew Yen Ho** is Consultant Cardiac Morphologist at the Royal Brompton Hospital, London. Her main interests are research and education in congenital heart disease and arrhythmias including morphological correlates with cardiac imaging, surgery, interventions, and electrophysiology.

She has pioneered numerous specialist short courses including the renowned 'Hands-on Cardiac Morphology' for practitioners and allied health professionals. www.rbht.nhs.uk/cardiacMorphology

Dr. **Joost E. Lumens** is a Biomedical Engineer working as a tenured researcher in the Cardiovascular Research Institute Maastricht (CARIM) of Maastricht University. He leads the CircAdapt Research and Education Team (www.circadapt.org). His research focuses on cardiac mechanics and hemodynamics in the normal and the diseased heart. He currently is the Chair-Elect of the European Society of Cardiology Working Group on e-Cardiology.

His research approach typically combines computer modeling/simulation with experimental and clinical data to gain mechanistic insight in cardiac diseases and their treatments (e.g. cardiac resynchronization therapy). Importantly, translation of novel mechanistic insights into diagnostic, therapeutic and educational improvement is always pursued.

Saturday, September 16, 2017

08:30 Opening
09:00 Welcome and „warm up“ Berger

Peter E. Lange Lecture

09:05 Historical evolution of patho-anatomical knowledge about the RVOT Ho

I. Modern Platform for Decision Making and Planning

Chairmen: Schubert / Ewert

09:35 Clinically based decision making / Guidelines Michel-Behnke
09:50 Incorporating 3D Imaging and Printing in RVOT management Glöckler
10:05 Image fusion (Echo/CT/MR with angiography) Schubert

Highlight Lecture

10:25 Machine based decision making – when, how, what? Hennemuth
10:45 Ask the experts
11:00 Break

II. Transcatheter Valve Replacement (TPVR) - Past and Present

Chairmen: Nordmeyer / Bonhoeffer

Keynote Lecture

11:30 Approaching 20 years experience with TPVR – what have we learned? Bonhoeffer
12:00 Ten years of Melody: pooled data – clinical experience Ewert
12:20 Midterm experience – Edwards valve in pulmonic position Haas
12:40 Current results - Venus P valve Qureshi
13:00 Ask the experts
13:15 Lunch

III. Surgery – Paving the Way

Chairmen: Berger / Photiadis

- | | | |
|-------|--|-----------|
| 14:45 | No valve – no chance – Valve sparing techniques or conduit replacement | Prêtre |
| 15:05 | Transannular patch – good for lifetime? | Tsang |
| | Do interventional needs determine the first surgical approach? | |
| 15:25 | Pro | Benson |
| 15:45 | Contra | Photiadis |
| 16:05 | Round table rebuttal – Ask the experts | |
| 16:25 | Break | |

IV. Complications / Limitations

Chairmen: Schubert / Benninck

- | | | |
|-------|--|------------|
| 16:55 | Endocarditis – Incidence and implications | Eicken |
| 17:15 | Pathohistology of the explanted specimen | Sigler |
| 17:30 | Biofilm analysis – a diagnostic must | Moter |
| 17:45 | Coronaries – the game changer | Schubert |
| | Complex bifurcation – a preclusion for interventional solutions? | |
| 18:05 | Pro | Benninck |
| 18:20 | Contra | Kretschmar |
| 18:35 | Round table rebuttal – Ask the experts | |
| 18:50 | Adjourn | |
| 19:00 | Get together | |

Sunday, September 17, 2017

Sunday morning Highlight Lecture

09:30 Right ventricular (dys)function: what can we learn from virtual patients? Lumens

V. Nutrition / Pharmacology / Physiology

Chairmen: Kühne / Ovroutski

10:00 Heart failure and nutrition Grune

10:20 Updates on current pediatric trials for heart failure medication Bonnet

10:40 Adaptive, adverse and reverse remodeling in normal pulmonary vascular resistance and PAH Kübler

11:00 Ask the experts

11:15 Break

VI. Valve Replacement – Innovations I

Chairmen: Tsang / Prêtre

Keynote Lecture

11:45 Tissue engineering - we grow with our needs Emmert

12:15 Autologous solutions Schmitt

12:30 Decellularized solutions Horke

12:45 Bioabsorbable carriers Feyerabend

13:00 Ask the experts

13:15 Lunch

VII. Valve Replacement – Innovations II

Chairmen: Qureshi / Kretschmar

14:15	Alterra	Krings
14:30	Harmony	Benson
14:45	Pulsta and others	Qureshi
15:00	Concept of an expandable cardiac valve for surgical implantation	Emani
15:15	In silico engineering of devices	Capelli
15:30	Ask the experts	
15:45	Lottery draw	Berger
15:50	Closing remarks	Berger
15:55	13 th DHZB Lange Symposium draws to a close
