Treatment Options for End-Stage Heart Failure
2-Day DZHK Workshop
May 10–11, 2013

Presented by
Deutsches Herzzentrum Berlin

Chairmen
Roland Hetzer, MD, PhD
Evgenij V. Potapov, MD, PhD
Thomas Krabatsch, MD, PhD
Christoph Knosalla, MD, PhD

Registration/Organization
M. Teichmann
GHIB Services GmbH
Augustenburger Platz 1
13353 Berlin, Germany

Tel.: +49 30 – 4593 2302
Fax: +49 30 – 4593 2202
E-mail: mteichmann@dhzb.de

Maximum number of participants
20

Registration fee
EUR 400
Account GHIB Services GmbH
Bank Commerzbank AG
Account no. 2172 537 01
Bank code 100 800 00

Reference MCS Workshop

Place and date
Deutsches Herzzentrum Berlin
Augustenburger Platz 1
13353 Berlin, Germany

May 10–11, 2013

Times
Friday 8:00 to 16:00
Saturday 8:00 to 15:00

Accommodation
on request

Participation in the whole workshop is certified with 15 CME points by the Ärztekammer Berlin

New:
“Assist device fellowship” for 1 year at the DHZB under the direction of Prof. R. Hetzer
Ladies and gentlemen,

Mechanical circulatory support (MCS) systems are today an inherent option for treatment of end-stage heart failure, being implanted for short-term, long-term and permanent cardiac support. Our institution implants more than 200 of these systems each year, and the number is increasing.

The “Deutsches Zentrum für Herz-Kreislauferforschung” is an amalgamation of leading scientific centers focusing on research genetic, epigenetic and inflammatory causes of cardiomyopathies. One of the key therapeutic options is mechanical circulatory support in end-stage of the disease. To meet the requests we have received to pass on to others our experience with MCS, we have designed a course for interested physicians and scientists. The aim of the course is to present basic knowledge of heart failure and its treatment and the details of the different MCS systems and their role in the treatment of end-stage heart failure.

The course will also include basics of patient preparation, echocardiography, anticoagulation management and postoperative care. Further, the organization of an MCS treatment program and scientific questions will be discussed.

The participants will take part in ward rounds and consultations in the MCS outpatient department.

The Deutsches Herzzentrum Berlin is also offering an assist device fellowship for one year. Please send applications directly to me (hetzer@dhzb.de).

Thank you for your interest.

Roland Hetzer, MD, PhD
